7-10 DRYWALL

The examination for drywall is a 40 question, multiple-choice, **CLOSED BOOK** examination. The following references should be helpful in preparing for the drywall examination. *This is just a sample of the many good books available on the subject. These are not the only references available, and may not contain all of the necessary information to be competent in this trade or to pass the examination.* These books may possibly be obtained through a local library's collection, through the use of your local library's inter-library loan service, or through purchase by ordering through your local bookstore.
